

# DEVELOPING A FINGER-VEIN CAPTURING DEVICE

KWAN LIK HOU

This Report is submitted in Partial Fulfilment of Requirements for the Bachelor  
Degree of Electronic Engineering (Computer)

Fakulti Kejuruteraan Elektronik dan Kejuruteraan Komputer

Universiti Teknikal Malaysia Melaka

June 2015

**UNIVERSITI TEKNIKAL MALAYSIA MELAKA**

FAKULTI KEJURUTERAAN ELEKTRONIK DAN KEJURUTERAAN KOMPUTER

**BORANG PENGESAHAN STATUS LAPORAN**

**PROJEK SARJANA MUDA II**

**Tajuk Projek** : DEVELOPING A FINGER-VEIN CAPTURING DEVICE

**Sesi Pengajian** : 2014/2015

Saya KWAN LIK HOU mengaku membenarkan Laporan Projek Sarjana Muda ini disimpan di Perpustakaan dengan syarat-syarat kegunaan seperti berikut:

1. Laporan adalah hakmilik Universiti Teknikal Malaysia Melaka.
2. Perpustakaan dibenarkan membuat salinan untuk tujuan pengajian sahaja.
3. Perpustakaan dibenarkan membuat salinan laporan ini sebagai bahan pertukaran antara institusi pengajian tinggi.
4. Sila tandakan ( ✓ ) :

**SULIT\***

\*(Mengandungi maklumat yang berdarjah keselamatan atau kepentingan Malaysia seperti yang termaktub di dalam AKTA RAHSIA RASMI 1972)

**TERHAD\*\***

\*\* (Mengandungi maklumat terhad yang telah ditentukan oleh organisasi/badan di mana penyelidikan dijalankan)

**TIDAK TERHAD**

Supervisor's Name: DR. SYAFEEZA BINTI AHMAD RADZI

Date: .....

This thesis is dedicated to my father, who taught me that the best kind of knowledge to have is that which is learned for its own sake. It is likewise dedicated to my mother, who taught me that even the largest task can be achieved if it is executed one step at a time.

## ACKNOWLEDGEMENT

This *Projek Sarjana Muda 2* (PSM 2) report could not have been written without Dr. Syafeeza Binti Ahmad Radzi who not only served as my supervisor, but also encouraged and challenged me throughout my PSM 1. Not only that, my project will not be able to complete successfully without the supply of electronic components, etching machine, tools and applications as well as labs from my faculty, *Fakulti Kejuruteraan Elektronik dan Kejuruteraan Komputer* (FKEKK). In summation, my parents were also throwing me in both spiritual and economic support until I completed my task. Last but not least, my colleagues also lend me his helping hand to check, discuss and troubleshoot my project, never accepting less than my best exertions. Truly, I thank them all from the deep of my affection.

## ABSTRAK

Projek ini adalah untuk membina satu model “Peranti Penangkap Corak Saluran Darah Jari”. Peranti ini adalah satu alat yang akan menangkap imej saluran darah jari manusia dan akan digunakan untuk tujuan keselamatan biometrik, contohnya untuk tujuan pengesahan, pengiktirafan, dan juga pengambilalihan. Cahaya berhampiran inframerah, *Near Infrared* (NIR) akan dikeluarkan oleh satu bank NIR LED menubusi jari dan diserapkan oleh hemoglobin dalam darah kita. Kawasan-kawasan di mana sinar NIR diserap, iaitu saluran darah jari akan muncul sebagai kawasan gelap dalam imej yang ditangkap oleh kamera CCD yang terletak di sebelah yang bertentangan dengan jari. Imej yang telah ditangkap akan diproses serta dianalisis untuk tujuan keselamatan biometrik pada masa akan datang.

## ABSTRACT

The project is focusing on developing a finger-vein capturing device. It is a device that will capture the human finger vein image and will be used for biometric security purposes such as authentication, verification and identification. A near-infrared light (NIR) will be emitted by a bank of NIR Light Emitting Diodes (LEDs) which will penetrate the finger and are absorbed by the haemoglobin in the blood. The areas in which the NIR rays are absorbed (i.e. Veins) thus appear as dark regions in an image conveyed by a CCD camera located on the opposite side of the finger. The image captured is analysed by using Mean Square Error (MSE) and Peak Signal-to-Noise Ratio (PSNR) to set the suitable potentiometer level and to find determine the best finger-vein image.

CHAPTER	CONTENTS	PAGES
I	INTRODUCTION	1 - 4
	1.1 Project Introduction	1 - 2
	1.2 Project Objectives	2
	1.3 Problem Statements	3
	1.4 Scopes of Works	4
II	LITERATURE REVIEWS	6 - 19
	2.1 Theory of Biometrics	6 - 7
	2.2 Theory of Finger-vein Biometrics	7
	2.3 Features and Comparisons between Finger-vein	8
	2.3.1 Resistant to Criminal Tampering	8
	2.3.2 High Accuracy	8
	2.3.3 Unique and Constant	9
	2.3.4 Contactless	9
	2.3.5 Ease of Feature Extraction	9
	2.3.6 Fast Authentication Speed	9
	2.3.7 Disadvantages of other Biometrics Traits	10
	2.4 Types of Sensors being Used in Camera	11 - 12
	2.4.1 Charge-coupled Device (CCD) Image Sensor	11 - 12
	2.4.2 Complementary Metal-oxide Semiconductor (CMOS) Image Sensor	12
	2.5 Finger-vein Pattern Imaging Methods	
	2.5.1 Light Reflection Method	13 - 14
	2.5.2 Light Transmission Method	15
	2.6 Mean Square Error (MSE) and Peak Signal-to- Noise Ratio (PSNR)	16
	2.7 Summary of Previous Studies	17 – 19

	2.8 Summary	19
III	METHODOLOGY	20 - 38
	3.1 Introduction	20
	3.2 Methodology	29 - 34
	3.2.1 Finger Vein Pattern Imaging Methods	21 - 22
	3.2.2 Building the Finger Vein Capturing Device's Prototype	23 - 30
	3.2.2.1 NIR Illuminating Circuit Design and Simulation	24
	3.2.2.2 NIR Illuminating Circuit Construction and Testing on Breadboard	25
	3.2.2.3 NIR Illuminating Circuit Etching and Soldering	26
	3.2.2.4 Modification of Suitable CCD Webcams	27 - 29
	3.2.2.5 Evaluating and Initial Capture of a Finger-vein Image	30
	3.2.3 Developing the Finger-vein Image Analysis Methods	31 - 32
	3.2.3.1 Determine the Standard Finger- vein Image	32
	3.2.3.2 Determine the Best Finger-vein Image	32
	3.2.4 Developing the Finger-vein Capturing Device's GUI	33 - 35
	3.2.5 Correct Methods in Using Finger-vein Capturing Device	36 - 37
	3.2.6 Analysing and Collecting Results	38
	3.2.7 Testing and Troubleshooting	38

	3.2.8 Report Writing	38
IV	RESULTS, ANALYSIS AND DISCUSSIONS	39 – 104
	4.1 Simulation of NIR Illuminating Circuit	39 - 41
	4.2 NIR Circuit Construction and Testing on Breadboard	42 - 43 38 - 40
	4.3 Results	44
	4.3.1 Documentation of The Finger-vein Capturing Device's Prototype being Built	44 - 56
	4.3.1.1 The Circuit was Constructed in Proteus ISIS	45
	4.3.1.2 The ISIS Circuit Drawing was then Converted to ARES and Rerouted	46
	4.3.1.3 The Sensoic Webcam 8000 was Scattered	47
	4.3.1.4 The Lens was Detached from the CCD Sensor	48
	4.3.1.5 The IR Filter was Detached from the Lens	49
	4.3.1.6 The Lens was Mount Back to the CCD Sensor	50
	4.3.1.7 The Electronic Components were Soldered on to the Circuit Board	51
	4.3.1.8 The Black Exposed Film was Glued to Cover the Webcam	52
	4.3.1.9 The Body of the Prototype was Built	53 - 54
	4.3.1.10 Sponge and Transparent Plastic Paper were Added to the Finger Placement Section	55

4.3.1.11 The Potentiometer's Level as well as the Switch were Labelled	55
4.3.1.12 Final Product or Prototype	56
4.3.2 Development of the GUI for the Finger-vein Capturing Device by Using MATLAB	57 - 64
4.3.2.1 The GUI Layout for the Finger-vein Capturing Device was Designed	57 - 58
4.3.2.2 The Finger-vein Capturing Device Prototype's Webcam was Configured	58 - 59
4.3.2.3 The Configure Webcam was Previewed in the GUI	60
4.2.3.4 The Finger-vein Images was Captured	61
4.2.3.5 The Finger-vein Images were Saved to the Particular Directories	62
4.2.3.6 The Standard Finger-vein Image from "Capture" Directory was Determined	63
4.2.3.7 The Best Finger-vein Images from the "Database" Directory was Determined	64
4.3.3 Steps in Using Finger-vein Capturing Device and Its GUI	65 - 83
4.3.3.1 The Finger-vein Capturing Device's Prototype was Connected to the Computer via USB Port	65
4.3.3.2 The GUI Named "FingerVeinCapture_GUI" was Run from MATLAB	66
4.3.3.3 The Correct Video Input Device was Selected	67
	67

4.3.3.4 The Finger-vein Capturing Device ID was Selected	68
4.3.3.5 The Suitable Video Format and Resolution was Selected	69 - 70
4.3.3.6 User's Finger was Placed into the Prototype	71
4.3.3.7 The Finger-vein Image was Previewed from the GUI	72
4.3.3.8 The Finger-vein Image was Captured	73
4.3.3.9 The Captured Finger-vein Image was Saved	74 - 77
4.3.3.10 Total of First 10 Finger-vein Images of Different Brightness were Captured and Saved	78
4.3.3.11 The Standard Finger-vein Image is Determined	79 - 82
4.3.3.12 Total of Second 10 Finger-vein Images Based on Standard Potentiometer Level are Captured and Saved	82 - 83
4.3.3.13 The Best Finger-vein Image is Determined	84 - 104
4.4 Finger-vein Images Analysis	85 - 93
4.4.1 Find the Standard Finger-vein Images	85
4.4.1.1 User was Required to Enter the User Number	86
4.4.1.2 The First Ten Captured Finger-vein Images from "Capture" folder was Read into MATLAB	87
4.4.1.3 The Finger-vein Images were Cropped	88

4.4.1.4 The Finger-vein Images were Converted to Type Double	89
4.4.1.5 The Finger-vein Images’ Channel were Reduced from RGB to Grayscale	89
4.4.1.6 The Mean Value among the First Ten Finger-vein Images was Determined	90
4.4.1.7 The MSE of the Ten Captured Finger-vein Images to the Mean Value were Determined	91
4.4.1.8 The PSNR of the First Ten Captured Finger Vein Images were Determined	92
4.4.1.9 The Minimum MSE and Maximum PSNR were Determined	
4.4.1.10 The User Number, Minimum MSE and Maximum PSNR were Displayed	92
4.4.1.11 The Standard Finger-vein Image was Determined based on the Mean Value	93
4.4.2 Find the Best Finger Vein Images	94 - 104
4.4.2.1 The Command Window was Cleared and Global Variables were Declared	94
4.4.2.2 The Other Ten Captured Finger-vein Images from “Database” folder was Read into MATLAB	95
4.4.2.3 The Finger-vein Images were Cropped	96
4.4.2.4 The Finger-vein Images were Converted to Type Double	97

4.4.2.5	The Finger-vein Images' Channel were Reduced from RGB to Grayscale	98
4.4.2.6	The MSE of the Secondly Captured Ten Finger-vein Images to the Standard Image were Determined	99
4.4.2.7	The PSNR of the Secondly Captured Ten Finger Vein Images were Determined	100
4.4.2.8	The Minimum MSE and Maximum PSNR were Determined	101
4.4.2.9	The User Number, Minimum MSE and Maximum PSNR were Displayed	101
4.4.2.10	The Best Finger-vein Image was Determined	102
4.4.2.11	Normalized Histograms were Calculated for Both Standard Image and Best Image	103
4.4.2.12	The Standard Finger-vein Image and the Best Finger-vein Image Together with Their Histograms were Displayed	103 - 104
V	CONCLUSIONS	105 - 107
5.1	Conclusions	105 - 106
5.2	Novelty and Inventiveness	106
5.3	Future Recommendation	106
5.4	Potential of Commercialization	107

4.58	The Best Finger-vein Image was Determined for User 1	83
4.59	Cropped Finger-vein Image and Histograms of the Standard Image and Best Image of User 1	83
4.60	Dialog Box was popped out Asking User to Enter the User Number	85
4.61	The First 10 Captured Finger-vein Images from User were Read from “Capture” Folder	86
4.62	The First 10 Finger-vein Images are cropped after being Read	87
4.63	The First 10 Cropped Finger-vein Images were converted to Type Double	88
4.64	The First 10 Images were reduced Channel from RGB to Grayscale after being converted to Type Double	89
4.65	The Mean Value is determined among the First 10 Finger Vein Images	89
4.66	The MSE for each of the Firstly Captured Ten Finger-vein Images to the Mean Value were determined	90

4.67	The PSNR for each Firstly Captured Ten Finger-vein Images were determined	91
4.68	The Minimum MSE and Maximum PSNR were determined	92
4.69	Displaying the User Number, Min MSE and Max PSNR	92
4.70	Standard Image of User 1 was determined	93
4.71	Results in GUI Showing which User, Min MSE, MAX PSNR and finally Standard Finger-vein Image	93
4.72	Command Window was cleared & Global Variables were declared	94
4.73	Secondly 10 Captured Finger-vein Images from User in "Database" Folder was read into MATLAB	95
4.74	The Secondly Captured 10 Finger-vein Images were cropped	96
4.75	The Secondly Captured 10 Cropped Finger Vein Images were converted to Type Double	97
4.76	The Secondly Captured 10 Images were reduced Channel from RGB to Grayscale	98
4.77	The MSE for each Secondly Captured Ten Finger Vein Images to the Standard Finger-vein Image were determined	99
4.78	The PSNR for each Secondly Captured Ten Finger Vein Images to the Standard Finger-vein Image were determined	100
4.79	The Min MSE and Max PSNR for "Database" Finger Vein Images of User 1	101
4.80	Results Showing User Number, Min MSE and Max PSNR of "Database" Finger Vein Images of User 1	101
4.81	Best Finger-vein Image of User 1 was determined	102
4.82	Results in GUI Showing which User, Min MSE, MAX PSNR and finally Best Finger-vein Image	102

4.83	Image and Best Normalized Histogram for Standard Image	103
4.84	Function in MATLAB to Calculate and Display the Normalized Histogram of The Standard Finger-vein Image and the Best Finger-vein Image	104
4.85	The Standard Finger-vein Image and the Best Finger-vein Image Together with Their Histograms are displayed	104
