**AUGMENTED REALITY: “KEMPEN PERANGI AEDES”**

**ROSSYAFINA BINTI RABIAH**

This report is submitted in partial fulfilment of requirements for the  
Bachelor of Computer Science (Media Interactive)

FACULTY OF INFORMATION AND COMMUNICATION TECHNOLOGY  
UNIVERSITI TEKNIKAL MALAYSIA MELAKA

2015

## BORANG PENGESAHAN STATUS TESIS

JUDUL: AUGMENTED REALITY : "KEMPEN PERANGI AEDES.

SESI PENGAJIAN: SEM 2 2014/2015.

Saya ROSSYAFINA BINTI RABIAH

(HURUF BESAR)

mengaku membenarkan tesis (PSM/Sarjana/Doktor Falsafah) ini disimpan di Perpustakaan Fakulti Teknologi Maklumat dan Komunikasi dengan syarat-syarat kegunaan seperti berikut:

1. Tesis dan projek adalah hakmilik Universiti Teknikal Malaysia Melaka.
2. Perpustakaan Fakulti Teknologi Maklumat dan Komunikasi dibenarkan membuat salinan untuk tujuan pengajian sahaja.
3. Perpustakaan Fakulti Teknologi Maklumat dan Komunikasi dibenarkan membuat salinan tesis ini sebagai bahan pertukaran antara institusi pengajian tinggi.
4. \*\* Sila tandakan (/)

       SULIT

(Mengandungi maklumat yang berdarjah keselamatan atau kepentingan Malaysia seperti yang termaktub di dalam AKTA RAHSIA RASMI 1972)

       TERHAD

(Mengandungi maklumat TERHAD yang telah ditentukan oleh organisasi/badan di mana penyelidikan dijalankan)

  /   TIDAK TERHAD

**MUHAMMAD HELMY BIN EMRAN**  
Pensyarah  
Fakulti Teknologi Maklumat dan Komunikasi  
Universiti Teknikal Malaysia Melaka (UTeM)

  
(TANDATANGAN PENULIS)

Alamat tetap: NO.15, LORONG 6,

JALAN 9/10, TAMAN AIR BIRU,

81700 PASIR GUDANG, JOHOR

Tarikh: 27/08/15

  
(TANDATANGAN PENYELIA)

MUHAMMAD HELMY BIN EMRAN

Nama Penyelia

Tarikh: 27/08/2015

CATATAN: \* Tesis dimaksudkan sebagai Laporan Akhir Projek Sarjana Muda (PSM) \*\*  
Jika tesis ini SULIT atau TERHAD, sila lampirkan surat daripada pihak berkuasa.

## DECLARATION

I hereby declare that this project report entitled  
**AUGMENTED REALITY: “KEMPEN PERANGI AEDES”**

is written by me and my own effort and that no part has been plagiarized  
without citations.

STUDENT : \_\_\_\_\_ Date: 27/08/15

## **DEDICATION**

To my parents,  
for your support and love.

To my friends,  
for your kindness and endless support.

To my lecturers,  
for never giving up for me.

## AKNOWLEDGEMENTS

I would like to thank En Muhammad Helmy Bin Emran for giving assistant to complete this project successfully. He also had given full attention and guides me to finish this project.

I would also like thank to my beloved parents, En. Rabiah Bin Ismail and Pn. Rusliha Binti Mohammed, who have been giving me endless support and motivation throughout my project.

I would also like thank to all my friends, who have been reprove my mistakes and provide ideas for improving my projects. Special thanks for them and it is fully appreciated.

## ABSTRACT

Deaths due to dengue fever are a serious concern. As a citizen of a message, I want to create an awareness campaign to produce several posters. The project focuses on seven statements about the introduction, literature review and methodology of the project, analysis, design, implementation, testing and conclusions. The introduction shows an overview of the project. Literature review and project materials discuss the project methodology and methods used in developing the project. Analysis provides the necessary requirements in the development of the project. The design defines the analytical results and need all the detailed requirements. Implementation describes the activities involved in the implementation phase and expected output. Testing discusses the testing phase and the strategy used. Finally, the concluding shows an overview of the project and the improvement needed in the project. The aim of this project was implemented to overcome the weaknesses of existing products such as the lack of information, interest and interaction.

## ABSTRAK

Kes kematian akibat demam denggi semakin membimbangkan. Sebagai seorang rakyat yang pihatin, saya ingin membuat satu kempen kesedaran dengan menghasilkan beberapa poster. Projek laporan memberi tumpuan kepada tujuh bab iaitu pengenalan, kajian literatur dan metodologi projek, analisis, reka bentuk, pelaksanaan, pengujian dan kesimpulan. Bab pengenalan menunjukkan gambaran keseluruhan projek ini. Bab kajian literatur dan projek metodologi membincangkan mengenai bahan projek dan kaedah yang digunakan dalam membangunkan projek tersebut. Bab analisis menyediakan keperluan yang diperlukan dalam membangunkan projek tersebut. Bab reka bentuk mentakrifkan keputusan analisis dan memerlukan semua keperluan terperinci. Bab pelaksanaan menggambarkan aktiviti yang terlibat dalam fasa pelaksanaan dan hasil yang dijangkakan. Bab ujian membincangkan fasa ujian dan strategi yang digunakan. Akhir sekali, bab kesimpulan menunjukkan gambaran keseluruhan projek dan peningkatan yang diperlukan dalam projek itu. Tujuan projek ini dilaksanakan adalah untuk mengatasi segala kelemahan produk yang sedia ada seperti kekurangan informasi, kurang menarik dan tidak mempunyai interaksi.

## CHAPTER I

### INTRODUCTION

#### 1.1 Introduction

Statistic shows rising number of dengue cases in our country. The number of people who have died from dengue fever in Malaysia has more than tripled on 2014 compared to 2013, with 250 cases being reported daily. The increase comes despite extensive government campaigns to highlight the danger of the virus, which is transmitted via mosquito bites. ([www.bbc.com](http://www.bbc.com)).

At 8<sup>th</sup> February 2009, there is a campaign about Aedes names “10 Minute Every Week Destroy Aedes, Fight Dengue” placed at Taman Taming Jaya, Balakong Selangor. The objective of this campaign is to increase awareness in society and encourage them to be responds towards preventing from dengue fever. The focus of this campaign is to destroy the places for Aedes breeding inside and outside their home.

The interactive posters on this fight the dengue campaign is produce by using Adobe Illustrator. Apart from that, the developer use Metaio Creator to built an augmented reality technology, AutoDesk Maya 2010 to build the 3D character animation. Augmented reality give a poitive feedback towards children. For example, a learning words using AR was developed by Juanand and his team had also proven effective as out of 32 children, 81% of them like using of augmented reality for learning. (Juan, 2010). In order to view the product, user can install Junaio in their

handphone or smart phone by download it for free at play store or apple store. User can use this application to view the 3D mosquito on that poster.

## **1.2 Problem Statement**

The rising number of dengue cases in our country becomes a serious concern. This happened because our society does not have a high awareness in preventing mosquito breeding. It had been proved by the increasing the number of dengue cases in Malaysia. From my observation, number of dengue cases in Malaysia increased more than 600% during the first 2 months in 2014, compared to the same period in 2013 (Malaysia Health of Department,2014). Therefore, awareness campaigns should be organized to enlighten the public on how mosquitoes breeding and from there, they can tackle mosquito breeding areas around their homes. From my observation, people only have information about Aedes through advertisement on television or simple poster suspended along the street. But there is no application using mobile device or using augmented reality technology to help people understands more about Aedes. From this issue, several posters will be developed by using Augmented Reality technology to help the society understand about the danger of Aedes and dengue.

### 1.3 Objective

Before start this project the aim of the project need to be set up first. This project is based on the following objectives:

- i. To study about dengue fever and the factor contributing the fever cases.
- ii. To develop a campaign using Augmented Reality containing a dengue information to educate people.
- iii. To test campaign using Augmented Reality are acceptable among people.

### 1.4 Scope

Specifying the work, the scope put in the picture to know where the project will lead to. Here are the scopes for the project:

- i. This project is to develop a campaign using Augmented Reality containing dengue information to educate children about the awareness of Aedes.
- ii. The target user for the augmented reality technology is children within the age of seven until twelve years old.
- iii. A series of poster is created and substitute 3D animation consists of several interesting characters and environments.

## **1.5 Project Significance**

This poster created to bring awareness to the community, especially to the kids about dangers of dengue fever and share information about ways to prevent Aedes breeding. By using this augmented reality technology, children will more interested to learn something. Hope this tool can bring benefits to society especially to the children.

## **1.6 Conclusion**

This project will be built the application with the use of augmented reality technology in a series of posters that will help people understand the ways on how Aedes breeding using 3D animation to capture child's interest. I hope that it will help children to influence their parent and give them awareness about the danger of dengue indirectly.

## CHAPTER II

### LITERATURE REVIEW & PROJECT METHODOLOGY

#### 2.1 Introduction

This chapter describe on overview of solving problem regarding to development of Augmented Reality (AR) content in poster. A lot of information is required in order to develop this project. One of the most favorite solutions is by searching on the internet. Internet provides much information about Augmented Reality and their useful to the user and the color scheme to build a poster to bring awareness to the children. An analysis and observation on the existing awareness poster about Aedes in Malaysia is used as a reference to develop this project so that the developer can produce better product towards user.

#### 2.2 Domain

Augmented Reality is used as a platform to bring awareness especially to the kids about the danger of Aedes so that they can clearly see the structure of Aedes with the help of modelling in 3D and they can get knowledge about how Aedes breeding. Domain for this project is to create an Augmented Reality in image on poster.
