DECLARATION

I hereby, declared this report entitled HOME WATER MONITORING SYSTEM is the results of my own research except as cited in references.

Signature:

Author : NurFarah Diyanah Binti Mahat

Date: 12 December 2019

APPROVAL

This report is submitted to the Faculty of Electrical and Electronic Engineering Technology of Universiti Teknikal Malaysia Melaka (UTeM) as a partial fulfilment of the requirements for the degree of Bachelor of Electronic Engineering Technology (Telecommunication) with Honours. The member of the supervisory is as follow:

Signature:

Supervisor : Norlezhah Binti Hashim

Signature:

Co-supervisor: Dayanasari Binti Abdul Hadi

ABSTRAK

Projek ini adalah tentang pembangunan Sistem Pemantauan Air di Rumah dengan menggunakan system 'Internet of Things (IoT)'. Project ini mampu memantau aliran air yang melalui sensor pengaliran air, dapat juga memantau nilai pH air menggunakan sensor pH air dan boleh mengesan kualiti air yang mengukur tahap turbiditi air tersebut tanpa wayar yang melaluinya dan memaparkannya pada aplikasi Blynk melalui komunikasi Wi-Fi. Tujuan utama bagi projek ini dibangunkan adalah untuk mengurangkan pekerjaan yang manual dan memajukan lagi teknologi pada era terkini ini. Selain itu, dengan menghubungkan atau menyatukan sistem Wi-Fi di dalam projek ini, ia juga dapat meningkatkan pemindahan data. Seperti sedia maklum, kelajuan data pemindahan oleh Wi-Fi adalah lebih tinggi berbanding komunikasi tanpa wayar yang lain. Walaubagaimanapun, semakin tinggi perlindungan keselamatan, Sistem Pemantuan Air di Rumah boleh di akses atau di pantau secara terus oleh pengguna hanya menggunakan telefon pintar mereka.

ABSTRACT

This project is about the development of Home Water Monitoring System that based on Wi-Fi and Internet of Things (IoT). This project could monitor the water that flow through the water flow sensor, monitor the pH value of water by using the pH water sensor and also can detects the quality of water by measuring the levels of turbidity that wirelessly through the Blynk Apps thru the Wi-Fi communication. The main function of developing for this project is to decrease the worker that work manually and decrease the company cost by hiring the worker. Moreover, with the arrangement of Wi-Fi system with this project, it will growth the data rate transfer. As we known that the speed of data rate are transfer by Wi-Fi was greater than the other wireless communication. Besides that, with the better protection of the security, this system will be able to access or monitor it directly by the user's smartphone.

DEDICATION

Special dedication to my beloved parents,

EN. MAHAT BIN MOHAMMAD

PN. JAMILAH BINTI JAMARI

My family,

(Muhammad Fauzee Bin Mahat, Muhammad Fikri Hakim Bin Mahat, Muhammad Faris Imran Bin Mahat, Nurfarah Batrisyia Binti Mahat)

My beautiful and kind supervisor,

PN NORLEZAH BINTI HASHIM

My beloved friends, classmates, housemates and coursemates

(Nur Alifah Binti Ahmad Termizi , Siti Hanum Fatehah Binti Bahar, Nur Ezzah Binti Wahab, Nur Sabrina Binti A Rahim, Nur Farah Afiqah Binti Mohd Yusuf, Nezyla Noorbaizatul Nafisah Binti Abdullah, Nur Qamareena Binti Abdul Halim, Nur Alia Liana Binti Daud, Shezlin Anzi Tan, Nur Farahin Binti Adhar, Joanna Anak Jendia, Awatif Binti Ismail, Nur Aliah Binti Nasir, Ahmad Ikmal Bin Sumadi)

Thank you for all your love, care and support also believe in me.

ACKNOWLEDGEMENTS

First and foremost, all praise and gratitude to Allah SWT for giving me strength to went through all difficulties and hardship to successfully finishing up my thesis. I wish to express my sincere appreciation to my beloved supervisor, Puan Norlezah Binti Hashim for valuable experience, encouragement, guidance, critics and friendship. Not forgotten to all the lecturers that had been taught me over these four years.

Next, I would like to express my appreciation to my beloved parents, Mahat Bin Mohammad and Jamilah Binti Jamari and also to all my family and friends for all their supports, motivation and pray from the initial of the project until the end of it. Last but not least, special thanks to my friends, my classmate and others that non-stop helping me and support me to complete this project.
