The application of 3D printing for the F302000 is the best. The key to 3D printing is the ability to create a model and print it out in a matter of hours. This is a great advantage for the user.

Identify Your Needs

1. Identify the part to be printed.
2. Create a 3D model of the part.
3. Select the material and color for the part.

Material Considerations

1. Select the material and color for the part.
2. Select the layer thickness for the part.

Print Settings

1. Select the layer thickness for the part.
2. Select the layer thickness for the part.

Commercialization

Support in every stage of the process from concept to production.

W

Commercialization

- Hybrid electric vehicles
- Portable devices
- Smart grids
- Intelligent manufacturing
- Power supply (AC or DC)
- Regenerative fuel

1. Hybrid electric vehicles
2. Portable devices
3. Smart grids
4. Intelligent manufacturing
5. Power supply (AC or DC)
6. Regenerative fuel
