[YEAR OF SUBMISSION]

## DECLARATION

I hereby declare that this project report entitled  
**[[A THIRD PERSON SHOOTER FOR TRAINING DECISION MAKING SKILL]]**  
is written by me and is my own effort and that no part has been plagiarized  
without citations.

  
  
STUDENT : MUHAMMAD MUIEZUDDIN BIN MOHAMAD Date : 13/9/2023

  
I hereby declare that I have read this project report and found  
this project report is sufficient in term of the scope and quality for the award of  
Bachelor of [Computer Science (Software Development)] with Honours.

SUPERVISOR : DR.NUR RAIDAH BINTI RAHIM

Date : 13/9/2023

## DEDICATION

This final project is dedicated to my beloved parents, En Mohamad and Pn Faridah who always support and pray for me

To my respected supervisor, Dr Nur Raidah Binti Rahim who has guided and advise me

And to my supportive friends for the co-operation and knowledge sharing in completing this project.

Thank you very much

## ACKNOWLEDGEMENTS

In the name of ALLAH S.W.T, The Most Merciful. Pray and peace upon the Prophet Muhammad S.A.W.

I would like to thank Dr Nur Raidah Binti Rahim d for giving assistance to complete this project successfully. Thank you for the patience and passion given on me throughout the development process of this project.

I would like to express deepest gratitude and appreciation to my faculty, Faculty of Information and Communication Technology for the opportunity given to undergo studies in Universiti Teknikal Malaysia Melaka (UTeM).

I would also like to thank my beloved parents who have been giving me support and motivation throughout my project. They always encourage me to never give up and stay positive to finish the project. Finally, I would like to thank my friends who always helped me when I needed them.

## ABSTRACT

The title of my game or project is Zombie Homeland. Basically the genre for this game is Third Person Shooter game (TPS) and Survival game. The theme of the game is horror because this game have zombie that always chase resident that still alive in that area. The game world is surrounded by zombie due to the spread of the zombie virus outbreak which causes many of the residents to be infected with the zombie virus. At the same time, there are still residents who survived the infection but there is no way to get out of the dangerous area due to the zombies that are always roaming around the area. So what player need to do is player need to survive and find the residents that hide at the area and take their out from this area. Why I'm develop this game?. It is because nowadays people always make decisions in a rush without thinking of the future and waste the resources to useless things. Furthermore, A Third Person Shooter game is any game a game focused on shooting where, instead of seeing through the main character's eyes, you see the main character from an external perspective. A third person view position the viewer perspective behind or around the player's in game character in games. Therefore , This project or game is train player about aiming and shooting using rifle and also complete the mission given but decision making is very important in game to implement in real life. The objectives of the project is to identify the Third Person Shooter game for training the decision making skills. In addition, is to design project or game for the training decision making skill using the Third Person Shooter game and lastly is to evaluate the usability and usefulness for the proposed product from the project develop In conclusion, what is player can learn and take it from this game is player can implement strategics in real life and learn how to defeat the zombie and also able to complete the mission given

## ABSTRAK

Tajuk permainan atau projek saya ialah Zombie Homeland. Pada asasnya genre untuk permainan ini ialah permainan Third Person Shooter (TPS) dan permainan Survival. Tema permainan adalah seram kerana permainan ini mempunyai zombi yang sentiasa mengejar penduduk yang masih hidup di kawasan tersebut. Dunia permainan dikelilingi oleh zombi akibat penularan wabak virus zombi yang menyebabkan ramai penduduk dijangkiti virus zombi. Pada masa sama, masih terdapat penduduk yang terselamat daripada jangkitan itu namun tiada jalan keluar dari kawasan berbahaya berikutan zombi yang sentiasa berkeliaran di sekitar kawasan itu. Jadi apa yang pemain perlu lakukan ialah pemain perlu bertahan dan mencari penduduk yang bersembunyi di kawasan itu dan membawa mereka keluar dari kawasan ini. Mengapa saya membangunkan permainan ini? Ini kerana pada masa kini manusia sentiasa membuat keputusan secara tergesa-gesa tanpa memikirkan masa depan dan membazirkan sumber untuk perkara yang tidak berfaedah. Tambahan pula, permainan A Third Person Shooter ialah mana-mana permainan yang memfokuskan pada menembak di mana, bukannya melihat melalui mata watak utama, anda melihat watak utama dari perspektif luaran. Pandangan orang ketiga meletakkan perspektif penonton di belakang atau di sekeliling watak permainan pemain dalam permainan. Oleh itu, projek atau permainan ini adalah melatih pemain tentang membidik dan menembak menggunakan senapang dan juga menyelesaikan misi yang diberikan tetapi membuat keputusan adalah sangat penting dalam permainan untuk dilaksanakan dalam kehidupan sebenar. Objektif projek ini adalah untuk mengenal pasti permainan Third Person Shooter untuk melatih kemahiran membuat keputusan. Di samping itu, adalah untuk mereka bentuk projek atau permainan untuk kemahiran membuat keputusan latihan menggunakan permainan Third Person Shooter dan terakhir adalah untuk menilai kebolegunaan dan kegunaan untuk produk yang dicadangkan daripada projek yang dibangunkan Kesimpulannya, apa yang pemain boleh pelajari dan ambil daripadanya. permainan ini adalah pemain boleh melaksanakan strategi dalam

kehidupan sebenar dan belajar bagaimana untuk mengalahkan zombi dan juga dapat menyelesaikan misi yang diberikan

## CHAPTER 1: INTRODUCTION

### 1.1 Project Background

This project is third person shooter and survival game. The game world is surrounded by zombies due to the spread of the zombie virus outbreak which causes many of the residents to be infected with the zombie virus. At the same time, there are still residents who survived the infection but there is no way out to get out of the dangerous area due to the zombies that are always roaming around the area. So player need to survive and find the residents that hide at the area and take their out from this area

### 1.2 Problem Statement

Nowadays, people always make decisions in a rush without thinking of the future and waste their resources on useless things. A Third Person Shooter game is any game a game focused on shooting where, instead of seeing through the main character's eyes, you see the main character from an external perspective. A third-person view positions the viewer's perspective behind or around the players in game character in video games. This project is train player about aiming and shooting using rifle and complete the mission given. Decision making is important to implement in real life

### 1.3 Objectives

The objectives of this project are:

- I. To study the requirements of the Third Person Shooter Game for training the decision-making skills

- II. To design and develop project or game for the training decision making skill using the Third Person Shooter Game
- III. To evaluate the effectiveness of the proposed game develop

#### **1.4 Goal and genre**

The main goal of this is player can implement strategics in real life by learning to defeat the zombie and complete the mission given. The genre of this game is Third Person Shooter and Survival games, and the platform is available for windows. This game allows players to kill zombie and save the residents that enhance spirit of helping between community in real life.

#### **1.5 Game features**

The project is a single player that will be developed using Unity Engine and Microsoft Visual Studio to produce Third Person Shooter and Survival Game. This game is developed for teenagers and adults from age 13 to 30 years old. The game is straight forward. Players need to complete 3 or 4 missions in just one game. Each mission of the player needs to find and rescue a group of residents hiding in an abandoned building. The reason why only has one level that compared to other game is main objective is player can explore all area for the maps

UNIVERSITI TEKNIKAL MALAYSIA MELAKA

#### **1.6 Conclusion**

In conclusion, basically the outcome of Third Person Shooter Game and Survival Game is player just knows how to show and does not challenge the player. By Third Person Shooter Game and Survival Games, players need to manage bullets and health properly it is because they need to survive until all resident at Zombie Homeland rescue. Next chapter will discuss literature review and methodology used in this project.
