WALL CLIMBING

A climbing wall is a vertical structure used with grips for hands and feet, usually made of wood, metal, or plastic. It is used for recreational purposes and is often found in schools, clubs, and community centers. The wall is made of vertical bars or ropes that are spaced at regular intervals. The height of the wall varies from a few feet to over 100 feet. The wall is usually made of wood or metal. The wall is usually made of wood or metal. The wall is usually made of wood or metal.
