

ONLINE JOB APPLICATION AND E-SELECTION SYSTEM

NUR ANNA AMIRIAH BINTI AMIR

KOLEJ UNIVERSITI TEKNIKAL KEBANGSAAN MALAYSIA

BORANG PENGESAHAN STATUS TESIS

JUDUL: ONLINE JOB APPLICATION AND E-SELECTION SYSTEM

SESI PENGAJIAN: SEMESTER 1 TAHUN 4 (2006/2007)

Saya NUR ANNA AMIRIAH BINTI AMIR
(HURUF BESAR)

mengaku membenarkan tesis (PSM/Sarjana/Doktor Falsafah) ini disimpan di Perpustakaan Fakulti Teknologi Maklumat dan Komunikasi dengan syarat-syarat kegunaan seperti berikut:

1. Tesis dan projek adalah hakmilik Kolej Universiti Teknikal Kebangsaan Malaysia.
2. Perpustakaan Fakulti Teknologi Maklumat dan Komunikasi dibenarkan membuat salinan untuk tujuan pengajian sahaja.
3. Perpustakaan Fakulti Teknologi Maklumat dan Komunikasi dibenarkan membuat salinan tesis ini sebagai bahan pertukaran antara institusi pengajian tinggi.
4. ** Sila tandakan (/)

_____ SULIT (Mengandungi maklumat yang berdarjah keselamatan atau kepentingan Malaysia seperti yang termaktub di dalam AKTA RAHSIA RASMI 1972)

_____ TERHAD (Mengandungi maklumat TERHAD yang telah ditentukan oleh organisasi/badan di mana penyelidikan dijalankan)

_____ TIDAK TERHAD

(TANDATANGAN PENULIS)

(TANDATANGAN PENYELIA)

Alamat tetap :
946-1 Jalan Sidang Hassan,
Bukit Katil,
75450 Melaka.

Nama Penyelia: Pn Safiza Suhana Kamal Baharin

Tarikh : 26 Oktober 2006

Tarikh : 22/11/2006

CATATAN: ** Jika tesis ini SULIT atau TERHAD, sila lampirkan surat daripada pihak berkuasa.

^ Tesis dimaksudkan sebagai Laporan Projek Sarjana Muda (PSM)

ONLINE JOB APPLICATION AND E-SELECTION SYSTEM

NUR ANNA AMIRIAH BINTI AMIR

**This report is submitted in partial fulfillment of requirements for the
Bachelor of Computer Science (BITS)**

**FACULTY OF INFORMATION AND COMMUNICATION TEECHNOLOGY

2007**

DECLARATION

I hereby this project entitle

ONLINE JOB APPLICATION AND E-SELECTION SYSTEM

Is written by me and is my own effort and that no part has been plagiarized without citations.

STUDENT :  Date : 22/11/2006
(NUR ANNA AMIRIAH BINTI AMIR)

SUPERVISOR:  Date : 22/11/2006
(PN SAFIZA SUHANAH KAMAL BAHARIN)

ACKNOWLEDGEMENTS

First of all, I would like to thank Allah for His blessings for me to complete this Projek Sarjana Muda (PSM). I would also like to give out my greatest thanks to all people who had helped me greatly in finishing this Projek Sarjana Muda (PSM) successfully.

I would also like to express my thanks to my Supervisor, Pn Safiza Suhana Kamal Baharin for her guidance, assistance and supports during the development process of Projek Sarjana Muda.

I would also like to thank the Human Resource Department in KUTKM for giving me an opportunity to have an interview and assist me in giving much information to develop the Projek Sarjana Muda II.

Finally, I like to thank all my friends who had been thorough PSM I and PSM II with me from start till the end. And to all people that have contributed directly or indirectly during my Projek Sarjana Muda.

ABSTRACT

Most company had started to do their works and business via web-based applications. It is because Internet acts as a medium to promote their products and services to the customers out there. With the assistance of Internet and web-based applications, it may widen their customers and make their jobs much easier than before. Human Resource Department is one of the important department in any organization to organize and responsible to the personnel issues. Therefore, this Online Job Application and E-Selection System was developed for the Human Resource Department in KUTKM to make a recruitment process. This system can be used by the jobseekers and staffs in HR Department. The Online JAES serves two main purposes, to apply job in KUTKM via online and to provide a computerized system of employee selection. The jobseeker needs to be registered to the system before he/she can make the job application. On the other side, all staffs in HR Department are registered by the Chief of Registrar Assistant, who has all restrictions on the applications. Besides of the registration and online job application, this Online JAES serves 3 other modules which are Login, Matching Job and Filtering. The Login module is responsible to authenticate the user. The Matching Job is used to set the criteria for each job and Filtering is used by the staffs of HR Department to check and filter all the received applications. The basis for developing the whole system was driven by the RUP methodology while the UML technique is used for system's design modeling. This system is implemented by using PHP and MySQL as its database.

ABSTRAK

Kebanyakan syarikat telah mula bekerja dan menjalankan perniagannya berasaskan aplikasi berasaskan web. Ini kerana Internet bertindak sebagai medium untuk mempromosikan produk dan servis mereka kepada pelanggan. Dengan bantuan Internet dan aplikasi berasaskan web, ia akan menarik lebih ramai pelanggan dan lebih memudahkan kerja mereka daripada sebelumnya. Jabatan Sumber Manusia merupakan salah satu jabatan yang terpenting dalam mana-mana organisasi untuk mengurus dan bertanggungjawab dalam hal-hal yang melibatkan pekerja. Oleh itu, Online Job Application and E-Selection System ini dibangunkan bagi kegunaan Jabatan Sumber Manusia KUTKM untuk melakukan proses pengambilan pekerja. Sistem ini boleh digunakan oleh pencari kerja dan pekerja dalam Jabatan Sumber Manusia. Online JAES ini mempunyai dua tujuan utama iaitu untuk memohon kerja di KUTKM secara *online* dan mengkomputerkan proses pemilihan kerja. Pencari kerja perlu berdaftar terlebih dahulu sebelum memohon pekerjaan. Manakala para pekerja dalam Jabatan Sumber Manusia akan didaftarkan oleh Ketua Penolong Pendaftar yang mempunyai kebenaran capaian ke atas semua permohonan. Selain dari *Registration* dan *Online Job Application*, Online JAES juga mempunyai 3 modul lain iaitu *Login*, *Matching Job* dan *Filtering*. Modul *Login* bertanggungjawab dalam pengesahan pengguna. *Matching Job* digunakan untuk menetapkan kriteria-kriteria bagi setiap kerja dan *Filtering* digunakan oleh staf di Jabatan Sumber Manusia untuk memeriksa dan menapis semua permohonan yang diterima. Asas pembangunan keseluruhan sistem ini menggunakan kaedah RUP dan teknik UML digunakan bagi merekabentuk model sistem. Sistem ini dibangunkan dengan menggunakan PHP dan MySQL sebagai pangkalan data.

CHAPTER I

INTRODUCTION

1.1 Project Background

This is a project developed for a jobseeker who applies for the job in KUTKM and personnel of Human Resource Department in Registrar Office, KUTKM. This project will be developed by referring the manual process of job application in KUTKM and processes to select the candidate employee. This project will focus on two main activities, which are online job application and selection employees in KUTKM. It means that this project will provide a two way communications between jobseekers and HR Department. In the first activity, jobseekers will apply the job online. However, to apply for the job, jobseekers need to register first, and give their absolute email address so that any information or notification will directly send to their mail's inbox.

To gain the second activity, this system will provide a table of administrator codes to specify each of the characteristics for each of the position. Then, the system will compare the inserted information from the jobseekers with the table, whether it is fulfilling the needed characteristics or not. The system will only make the process of selection after the final date and time of the job application.

This system also provides a notification via email automatically. Once the jobseekers complete the registration, the system will automatically acknowledge that the registration has been received and ready to be processed. Then, after the selection of employee has done, the system will notify each of the jobseeker of their status whether they are approved or rejected. This system will also provide a notification via email of the status of interview session.

1.2 Problem Statements

An employee selection in KUTKM is done by Human Resource Department of Registrar Office. The process is still done by manual process which jobseekers have to come to Registrar Office or post an empty envelop with their postal address and stamp. However, this process may cause two problems. First, this process may cause a late delivery, lost or damage of the application. Second, it also may produce a problem to a jobseeker that lives far away to come to KUTKM to apply for the vacancies.

Besides, the selection done by human may cause an unfair result. It will happen due to a nature of humanity, kindness, or biased. In case of that, the HR personnel may choose their friends, families, or anyone who has supports from influential people, who are not qualified for the vacancies.

The existing online job application systems have no notification whether the jobseekers' applications have been delivered, undelivered, accepted, or unaccepted. The jobseeker will be wandering about the status of their applications.

The manual process needs a lot of files and application forms. It may cause a bulky of files in the Registrar Office. This may drive into a problem of applications' lost, damage, tear or unseen.

1.3 Objectives

- a. **To provide a computerized system of employee selection**
Change the manual employee selection to be a computerized system
- b. **To reduce time of jobs application delivery by an online system**
Time of delivery of application via online is less compared to the delivery via post
- c. **To reduce works of HR staff to select a potential employee**
Works of selecting the employee is done by the system. The HR staffs only can see the applications' information and check the status of each application
- d. **Add a medium to display result**
Give a notification of status of the applications, whether they have been received, accepted or rejected. It also tells about the date and venue of interview session if the application has been approved, and notifies the status of the interview session.
- e. **Acts as a decision support system to select a potential employee**
The system will make the decision to select the potential employee

1.4 Scope

Scope is divided into 2 views which are the limitation of the project and the functions of the project.

1.4.1 Limitation View

a. User

Two types of user are registered jobseeker and registered personnel. The jobseeker can be anyone who seeks for job. While the registered personnel comes from HR Department only.

b. Software

Can be used only on Windows platform

c. Process applied

An online application to seek job and select potential employee.

1.4.2 Function View

1.4.2.1 Online Registration

Jobseeker needs to register to apply for the vacancies via online. The registration will require username or employee ID, an accurate and active email address and a password. The password can only contains an alphabet (A-Z) or numeric characters.

1.4.2.2 Online Job Application

User can apply two types of vacancies, whether academic or non-academic position. Apart from that, user needs to fulfill all the important fields required and upload any important documents. It can be done by any person; fresh graduate or employed person.
